Receipts Under Moore Plan. Having ascertained what annual revenues must be raised, Mr. Moore makes the following estimate of receipts under the plan that he proposes, to show that it will be ample to meet the legitimate needs of the State, taxes on railroads and other public service corporations to be based on gross receipts:

What the State Gives Up.

Under the foregoing tentative plan the State releases to the counties, cities and towns, for taxation property (not including incomes) of the present assessed value (in round numbers) \$733,-606,001 and takes from the counties, cities and towns for taxation by hereful property of present assessed values (in round numbers) \$183,000,000. The tax laws now in force need thorough and complete revision and adjustment to remove all double and excessive taxation where it now exists. This must be done carefully by a committee deliberately selected.

Section 169 of the Constitution contains the following provision:

"Nothing in this Constitution shall prevent the General Assembly, after

This language clearly manifests the This language clearly manness to makers of the Constitution intended, after a trial of ten years had been given to the Constitution as proclaimed, the General Assembly should have 35,000.00 troad and ample powers for dealing with taxation, and the language used in several places throughout the Constitution suggests the makers of the Constitution inclined to the plan of segregation.

In the above statement no provision is made for the support of the Departments of Agriculture, Dairy and Food, Insurance, and Banking, because they are supported by fees and taxes covity to a committee carefully and deare supported by fees and taxes covered into the State Treasury for their liberately selected, as above suggested.
